Economic Outlook Engagement

Economic Outlook is CMIE's flagship service. It is through this service, more than any other, that we strive to achieve our mission, which is to help our customers take informed decisions. To achieve this mission, we have attempted to provide you access to a comprehensive and updated database, deliver to you results of a preliminary examination of the data and also our view of where the Indian economy is likely headed.

These inputs are designed to help you in your business, your research or other applications.

CMIE is not a data vendor. It does not merely procure data from other sources and deliver it to you. A significant part of the database in Economic Outlook is CMIE's own creation – in areas where it sees gaps in the available databases. We also bring to you our expertise in harnessing these databases by commenting on the data.

Economic Outlook also provides a platform to engage.

We encourage our clients to Seek Clarifications on the data available on Economic Outlook, on our analysis and our forecasts. Your questions will be answered by the team of economists on our specially developed platform for the purpose.

Economic Outlook is CMIE's flagship service. It provides CMIE's view on the Indian economy by interpreting new data releases, providing insights and unraveling sources of changes.

Economic Outlook provides forecasts on growth, inflation, fiscal balance, balance of payments, corporate earnings and a host of other indicators. It discusses the future and explains its forecasts.

The database forms the bulk of the Economic Outlook service. With over 800,000 time-series that deliver over 30 million observations, Economic Outlook delivers the largest database on the Indian economy. And, it updates this in real-time.
